

We develop the first software for SMEs for stable positioning in the online world and help them achieve their business goals!

You can share this vision and you are an all-rounder with a focus on backend development? You can imagine taking responsibility for your own area in a young team? Free time management gives you quality of life and spurs you on to top performance in return? Then read on...

Software developer (m/w/d)

20h (from September 2022, Place of employment: Graz Umgebung, Innsbruck Land or remote)

Why we're looking for you:

- You are an expert when it comes to React (JavaScript / TypeScript) and you bring relevant experience with Laravel (PHP).
- SQL databases are more than familiar to you.
- You are looking for a job with meaning and you carry and shape the vision with us.
- You are committed to an open and honest culture of discussion within the team and you are passionate about your work.
- Together with our partners, you will create detailed specification sheets in order to build the MVP.
- You will independently take responsibility for the entire backend. Together with our frontend developer you define the architecture of the software.
- You are an essential part in building our software development department.
- You are the right person to accompany the market launch with us and to further develop the software in close cooperation with our pilot customers.

What we offer in return:

- You will work closely with the founders and be involved in decision-making processes.
- You will not be thrown in at the deep end – don't worry – because a thorough onboarding is important to us. You get time to familiarize yourself with our structure and the product.
- **You have the choice: Do you prefer to work in the Graz area, in Innsbruck-Land or completely remote? We are fine with your decision.**
- Through (start-up) events and trade fairs you will get to know new places and cities, stay up to date with the latest tech trends and have the opportunity to meet exciting personalities from all over the world.
- We foster a strong learning culture and offer you the opportunity to use learning and information platforms during your working hours. We're not just talking about the advanced C++ course, but whatever interests you. You just commit to sharing your knowledge with the team.
- What else you might like: MA notebook also for private use

Now it's up to you!

Send us your resume and tell us why we should invite you to lunch right away.

For legal reasons, we would like to point out that a KV minimum salary of EUR 2,635.00 gross per month applies for full employment (entry level STI), although the planned budget may well be higher and the actual salary will be determined on the basis of your qualifications and experience.
